Support Ticketing System

Admin Manual

Version 1.1 · November 2026

National Museum of the Philippines

Contents of This Guide

1. Introduction

2. General Information (Objectives, User Roles, System Features)

3. Getting Started: Log-in, Dashboard, System Navigation

4. Forms: Form Builder, Published Forms

5. Requests: Approvals, Request Management, Assigned to me, My Requests, Submit Request

6. Reports and Analytics

7. Messages

8. Settings and Account Profile

9. Notifications and Daily Activity

Appendix A: Approvals

1. Introduction

The Support Ticketing System (STS) is a centralized platform for the creation, review, publication, submission, approval, assignment, monitoring, and completion of staff support and service requests within the National Museum of the Philippines (NMP). It gives Admin, Record Admin, and Staff users the tools to build request forms, submit requests, and track each request from submission to final closure.

This manual guides Admin users. It covers logging in, using the Dashboard, building request forms in the Form Builder, monitoring Published Forms, processing requests (Approvals, Request Management, Assigned to me), submitting personal requests (Submit Request and My Requests), using Reports and Messages, and managing account settings.

Employee information such as name, email address, designation, division, and section is filled in automatically from PAMANA. The STS reduces manual paperwork and processing delays and keeps a clear audit trail for every form and ticket.

2. General Information

2.1 Objectives

The STS provides a single, efficient platform for managing, monitoring, and tracking staff support and service requests. It improves request visibility, accountability, and timely action by authorized personnel and offices. Configurable forms support different types of requests, and reports help offices monitor pending and completed work.

2.2 System Users and Their Descriptions

Role	Description
Super Admin	Highest level of access. Manages users, roles, and permissions, and can open the Admin, Record Admin, and Staff portals with one account, switching between them without signing out.
Admin	Section Heads of the ODG Section and Regional Component Museums, and Division Heads of all other divisions. Creates request forms in the Form Builder and submits them to Records; reviews, approves, or rejects requests at assigned workflow stages; assigns personnel to tickets; works on tickets assigned to them; and may submit personal requests.
Record Admin	Reviews forms submitted by Admins, then approves and publishes them or disapproves them with remarks. Monitors Pending Forms, Published Forms, and Activity Logs.

Staff (Client)	Museum employees who submit requests using published forms and track them under My Requests. When designated as Recommending Officer, Immediate Supervisor, or Action Officer, they also review requests in their For Review queues, mark services complete, answer the Client Satisfaction Survey, and close or reopen requests.

2.3 System Features

- **Form Builder.** Create request forms through a guided six-step wizard (General, Fields, Print Template, Client Request Approval, Workflow, Supporting Doc) and submit them to Records.
- **Form Review and Publishing.** Record Admins approve and publish forms or disapprove them with remarks. Only published forms can be used for requests. Form statuses: Draft, Pending Review, Published, Disapproved.
- **Request Submission.** Select a published form, fill in the fields (employee details are filled in from PAMANA), preview, and submit.
- **Request Approval.** Each request passes through the approval stages configured on the form. A rejection requires a reason that is shown to the requestor.
- **Personnel Assignment.** Admins, or the last Action Officer of a workflow, assign Open tickets to active Admin personnel of the same division as the form creator. Assignment sets the status to In Progress.
- **Ticket Status Tracking and History.** Tracks each ticket status and records significant actions: submission, review, approval, assignment, completion, and closure.
- **Document Upload and Form Preview.** Upload a printable PDF template and an optional supporting PDF (up to 25 MB each). Submitted answers appear at the positions mapped on the template.
- **Notifications.** Alerts for pending approvals, new messages, pokes, and request updates.
- **Messaging.** Group chats, direct messages, mentions, and pokes.
- **Reports and Analytics.** Per-form reports of closed tickets, plus a My Forms report of request volume by division and service category.
- **Service Completion and Feedback.** Requestors mark a service complete, answer the Client Satisfaction Survey, then close or reopen the ticket.
- **Role-Based Access and Audit Trail.** Access is restricted by role, and significant actions are recorded in the Activity Logs.

3. Getting Started

3.1 Log-in / Sign in

Open a web browser and go to support.nationalmuseum.gov.ph (Figure A.1). The STS login page is displayed (Figure A).

1. **Username.** Enter your Username (Figure A.2).
2. **Password.** Enter your PAMANA password (Figure A.3). Click the Show Password icon (Figure A.4) to show or hide what you typed.
3. **Sign In.** Click Sign In (Figure A.6).

Forgot password? (Figure A.5) displays the message “Contact your system administrator to reset your password.” The STS uses the PAMANA password, so it cannot be reset in the STS.

> **Note:** If you have enrolled in MFA, the system asks for the 6-digit code from your authenticator app (or a recovery code). If the credentials are wrong, the system shows “Incorrect email or password.”

[Figure A – Login page]

3.2 Dashboard

After login you land on the Dashboard, which shows the requests and forms that need your attention (Figure B).

- **Welcome banner.** Greets you by name and has two shortcuts: Review approvals (opens Approvals) and Open Form Builder (Figure B.1).
- **Summary cards.** Requests to approve (client submissions waiting for your approval, Figure B.2); Pending review (forms you sent that are waiting on Records, Figure B.3); Draft forms (forms saved but not yet submitted, Figure B.4).
- **Today’s activity.** Lists the day’s updates on requests and forms. When empty it shows “No activity yet today.” (Figure B.5).
- **Notification bell and profile menu.** The bell in the top-right header shows alerts; the profile menu shows your name and role (Admin).

[Figure B – Admin Dashboard]

3.3 System Navigation

The left sidebar groups the modules (Figure C). At the bottom of the sidebar, Settings opens your account page, Set up MFA turns on multi-factor authentication, and Logout ends your session.

Group	Menu item	Purpose
MAIN	Dashboard	Summary of pending approvals, forms, and today's activity.
MAIN	Reports	Per-form reports and the My Forms report.
MAIN	Messages	Group chats, direct messages, and pokes.
FORMS	Form Builder	Create a new request form with the six-step wizard.
FORMS	Published Forms	View the forms that have been published.
REQUESTS	Approvals	Requests waiting for your decision.
REQUESTS	Request Management	All tickets of your forms; assign personnel and track progress.
REQUESTS	Assigned to me	Tickets assigned to your account.
REQUESTS	My Requests	Requests you submitted for yourself.
REQUESTS	Submit Request	Submit a personal request using a published form.

[Figure C – Sidebar navigation]

4. Forms

4.1 Form Builder

The Form Builder creates a request form in a six-step wizard (Figure D). Click FORMS > Form Builder, or click Open Form Builder on the Dashboard. The New request form page shows your progress (for example, Step 1 of 6). Use Back to return to a previous step without losing your entries.

[Figure D – Form Builder steps]

Step 1 – General (Figure E)

- **Form title.** Enter a title that states the purpose, for example Service Request Form.
- **Reference number.** Generated automatically.
- **Date Effectivity.** Select the date from which the form is effective.

- **Version number.** The first version is v1.0.
- **Division/Section.** Filled in from your login.

Step 2 – Fields (Figures F and G)

The Form elements panel (left) lists field types, the Live preview (middle) shows what employees will see, and Field settings (right) edits the selected field.

- **Add fields.** Click an element to add it: Textbox, Textarea, Dropdown, Checkbox, Radio, Date Picker, Time Picker, Date & Time, File Upload, Email, Number, or Signature.
- **Set properties.** Select a field, edit its Label and Placeholder, and tick Required field if it must be completed. Each field has a Variable used when mapping it on the print template.
- **Arrange.** Drag rows in the Live preview to reorder them.
- **Continue.** At least one field is required; otherwise the system shows “Add at least one form field before continuing.”

Step 3 – Print Template (Figure H)

- **Upload the template.** Upload the printable PDF (maximum 25 MB). Multi-page PDFs are shown stacked so fields can be mapped on every page.
- **Map the fields.** Place each form field at its position. Submitted answers, including PAMANA fields, appear there.
- **Review.** Check alignment, spacing, and presentation.

Step 4 – Client Request Approval (Figure I)

- **Recommending Officer.** Turn this approval stage on or off.
- **Immediate Supervisor.** Turn this stage on or off. It can be turned on only while the Recommending Officer stage is on.

Step 5 – Workflow (Figure J)

- **Add Action Officers.** Add the personnel who will process the request.
- **Set the order.** Arrange Action Officers in processing order. The final Action Officer handles request management and personnel assignment.

Step 6 – Supporting Doc (Figure K)

- **Upload a supporting PDF (optional).** Maximum 25 MB.
- **Add instructions.** Describe the documents requestors must attach, if any.

Submitting the form

After checking all six steps, submit the form to Records for review, or save it as a draft. Form statuses:

Status	Meaning
Draft	Saved but not yet submitted. Counted under Draft forms on the Dashboard.
Pending Review	Submitted to Records, waiting for the Record Admin's decision.
Published	Approved by the Record Admin (Approve & publish) and available under Submit Request.
Disapproved	Returned to you with remarks from the Record Admin.

4.2 Published Forms

Click FORMS > Published Forms to see the forms that have been approved and published. Use the search box to find a form by name. Each entry shows the form's details, and the header shows the number of published forms (for example, "1 published form"). When there are none, the page shows "No published forms yet."

> **Note:** Request volume per form and per division is reported under MAIN > Reports (Section 6), not in the Forms group.

5. Requests

5.1 Ticket statuses

Status	Meaning
For Client Approval	With the Recommending Officer or Immediate Supervisor, when the form requires that review.
For Process Owner	With the Action Officer chain.
Pending Approval	Still waiting for an approval step.
Open	Active and ready for assignment.
Rejected	Rejected with a reason.
In Progress	Personnel assigned; work ongoing.
Pending	Holding status, set when the workflow allows it.
Resolved	The requestor clicked Mark service complete.

Closed	The requestor clicked Close ticket after submitting feedback.
Reopened	The requestor clicked Reopen request.

> **Note:** Approving a step does not produce an “Approved” status. The ticket shows the next status in the chain (For Client Approval, For Process Owner, or Open) until assignment sets it to In Progress.

5.2 Approvals

Approvals is the queue of requests that need your decision (Figure N). With an Action Officer workflow, approvals are done in sequence; an approved ticket then waits for assignment in Request Management.

1. **Open the queue.** Click REQUESTS > Approvals.
2. **Review the table.** The header shows the number of pending approvals. Columns: TICKET (reference number), CLIENT (requestor), DIVISION, STATUS (current approval stage), and ACTION.
3. **Decide.** Under ACTION, open the request details, then approve it, or reject it. A rejection requires a reason, which the requestor can see.
4. **Refresh.** Click Refresh (Figure N.2) to load the latest submissions. View all requests → opens Request Management.

[Figure N – Approvals queue]

5.3 Request Management

Request Management is the central queue for tracking the tickets of your forms and assigning personnel after Action Officer approval.

1. **Open the queue.** Click REQUESTS > Request Management.
2. **Review the table.** The header shows the number of requests. Columns: TICKET (reference and title), CLIENT, OFFICE/DIVISION/UNIT/SECTION, STATUS, and ACTION.
3. **View file.** Opens a read-only preview of the generated form and attached files. Use the zoom controls (– / +) and Reset, and close with X to return to the queue.
4. **Manage.** Opens the ticket details, where you assign personnel (Open tickets only; assignment changes the status to In Progress) and follow the ticket history.

[Figure O – Request Management and file preview]

5.4 Assigned to me

Assigned to me is your personal work queue of tickets assigned to your account (Figure Q). A badge on the menu shows how many are assigned.

1. **Open the queue.** Click REQUESTS > Assigned to me.
2. **Review the table.** Columns: TICKET, CLIENT, CLIENT DIVISION, STATUS (for example, In Progress), and ACTION to open the ticket.
3. **Do the work.** Perform the requested support or administrative task and keep the ticket updated.
4. **Finish.** When the work is done, notify the requestor. The requestor marks the service complete, submits feedback, and closes the ticket.

[Figure Q – Assigned to me]

5.5 My Requests

My Requests tracks the requests you submitted for yourself (Figure R).

- **Requests table.** Shows ticket number, service details, approval status, and assigned personnel. The header shows the number of requests.
- **Open a request.** Click a row to see the uploaded form, your answers, assigned personnel, and requestor actions. When the work is done, click Mark service complete, answer the Client Satisfaction Survey, then click Close ticket or Reopen request.
- **New request.** Click New request (upper right) to choose a form.

5.6 Submit Request

1. **Open.** Click REQUESTS > Submit Request. Use Back to my requests to return to your list.
2. **Choose a form.** In the Choose a form panel, open Select a form… and pick a published form. Its fields load.
3. **Fill in.** Complete the required fields (PAMANA details are filled in automatically) and upload any required attachments.
4. **Submit.** Click Submit. The request enters its approval workflow and appears under My Requests.

[Figure S – Submit Request]

6. Reports and Analytics

Reports (MAIN > Reports) summarizes request volume, completions, and client answers for the forms you own (Figure D-R).

6.1 Form report

1. **Open.** Click MAIN > Reports.
2. **Filter.** Choose the Form, Year, and Month (or All months). A summary line shows how many tickets are covered. Only closed tickets are counted.
3. **Report settings.** Click Report settings to choose what the report shows.
4. **Read the cards.** One card per form field shows the closed tickets' answers. Division/ Section appears as a donut chart (center = ticket count; legend = count and percentage). Other fields (for example Requestor's Name, Designation, Email Address, Purpose, Rationale) list the most frequent answers with columns #, Answer, and Requests.
5. **Export.** Click Export on a card to download its data.

6.2 My Forms report

The My Forms report gives an overview of requests received through your forms. Use the date range at the top to set the reporting period.

- **Key figures.** Total Requests (with change versus last month), Total Divisions / Sections, Most Requested Service, and Requests This Month.
- **Charts.** Requests by Division / Section (bars), Requests by Service Category (donut), and the Monthly Request Trend over 12 months (hover for exact counts).
- **Quick Insights.** Most Active Division, Most Requested Service, Fastest Growing, Top Service Share, and Avg Requests / Day.
- **Top Requesting Divisions / Sections.** A table of DIVISION / SECTION, REQUESTS, and % share.
- **Form cards.** Each form shows its name, form ID, status badge, number of submissions, and last submission date. Use View to preview the form layout and Chart to see analytics for that form.

7. Messages

Messages (MAIN > Messages) provides real-time group chats, direct messages, mentions, and pokes among Admin, Records, and Staff users (Figure E).

7.1 Chatting

1. **Open.** Click MAIN > Messages.
2. **Pick a conversation.** Choose a chat from the Chats list (for example NMP Team Chat) to load its history (Figure E.2–E.3). Messages appear instantly to all participants.
3. **Write.** Type in the message box. Use @ to mention a person or role (Figure E.4).
4. **Send.** Click Send or press Enter (Figure E.5).

7.2 New messages and pokes

1. **New.** Click + New to open the New message window (Figure F).
2. **Search.** Type a name, email, or division in the search box. Results are grouped under ADMIN and CLIENTS.
3. **Message or poke.** Click a person's row to start a private conversation, or click Poke beside the name to send an instant alert without opening a chat.

8. Settings and Account Profile

Open Settings at the bottom of the sidebar.

8.1 Account

- **Email and Role.** Shown for reference (for example, Admin).
- **Display name, Division / office, Designation.** Review and update as needed, then click Save profile.

8.2 Password

Enter the Current password, the New password, and Confirm new password, then click Change password.

8.3 Multi-factor authentication

Click Set up MFA in the sidebar to enrol an authenticator app. Afterwards, login asks for a 6-digit code.

9. Notifications and Daily Activity

A typical Admin day:

- Check the Dashboard cards and Today's activity.

- Click the notification bell for pending approvals, new messages, pokes, and request updates.
- Clear the Approvals queue.
- In Request Management, assign personnel to Open tickets.
- Work through Assigned to me and keep requestors informed.
- Check Messages for questions from colleagues.
- Review Reports for closed tickets and feedback.
