Appendix A: Approvals

INTRODUCTION

A. Overview

The Support Ticketing System (STS) is a centralized platform designed to streamline the creation, review, publication, submission, approval, assignment, monitoring, and completion of staff support and service requests within the National Museum of the Philippines (NMP). It provides Admin users, Record Admin users, and Staff users with the tools needed to build request forms, submit requests, and track each request from submission to final closure.

This manual serves as a guide for Admin users in using the Support Ticketing System. It covers the core functionalities of the platform, including logging in and navigating the dashboard, creating request forms in the Form Builder and viewing Published Forms, approving and managing requests (Approvals, Request Management, and Assigned to me), submitting personal requests (Submit Request and My Requests), using Reports and Messages, and managing account settings.

The STS aims to improve efficiency, accountability, and transparency in handling staff requests by reducing manual paperwork, minimizing processing delays, and providing a clear audit trail for every form and ticket processed within the system. Employee information such as name, email address, designation, division, and section is filled in automatically from PAMANA. This manual is intended for Admin users responsible for building forms and processing requests.

B. Objectives

The Support Ticketing System (STS) of the National Museum of the Philippines (NMP) aims to provide a centralized and efficient platform for managing, monitoring, and tracking staff support and service requests within the organization. The system will improve request visibility, accountability, processing efficiency, and timely action by authorized personnel and offices.

The STS makes the creation, review, submission, approval, assignment, and monitoring of requests easier and more organized. It helps users quickly check the status of their requests, reduces delays, and keeps a clear record of ticket transactions. The system also supports different types of staff support and service requests through configurable forms, and provides reports and updates that help offices monitor pending and completed requests.

C. User’s Role, Access and Permission

I. **Super Admin** has the highest level of system access and is responsible for overall system administration, including managing users, roles, and permissions. The Super Admin can open the Admin, Record Admin, and Staff portals with a single account and switch between them without signing out.

II. **Admin** is assigned to Section Heads of the ODG Section and the Regional Component Museums, and to Division Heads of all other divisions. Admin users create request forms in the Form Builder and submit them to Records, view them under Published Forms, and report on them under Reports. They review, approve, or reject requests at the applicable workflow stages, assign personnel to tickets, monitor their assigned work, and may submit personal requests through Submit Request.

III. **Record Admin** reviews and manages the forms that Admin users submit for publication. The Record Admin monitors Pending Forms and Published Forms, reviews form configurations, approves and publishes forms or disapproves them with remarks, and monitors activities through the Activity Logs.

IV. **Staff (Client)** are museum employees who submit requests using published forms and monitor them under My Requests. When designated as a Recommending Officer, Immediate Supervisor, or Action Officer, Staff users also review requests in their For Review queues. Depending on the workflow, they may mark a service as complete, submit the Client Satisfaction Survey, and close or reopen a request.

D. System Features

I. **Form Builder.** Allows Admin users to create request forms through a guided six-step wizard (General, Fields, Print Template, Client Request Approval, Workflow, and Supporting Doc) and to submit them to Records for review.

II. **Form Information Management.** Records essential details of each form, including the title, reference number, effectivity date, version number, fields, printable template, supporting document, and status (Draft, Pending Review, Published, or Disapproved).

III. **Form Review and Publishing.** Allows Record Admin users to review submitted forms and either approve and publish them or disapprove them with remarks. Only published forms are available for request submission.

IV. **Request Submission.** Allows users to select a published form, fill in the required fields, have their employee information filled in automatically from PAMANA, preview the form, and submit the request.

V. **Request Approval.** Routes each request through the approval stages configured on the form. A request approved at the final stage becomes Open, while a rejection requires a reason that is provided to the requestor.

VI. **Personnel Assignment.** Allows Admin users, or the last Action Officer in a configured workflow, to assign Open tickets to active Admin personnel from the same division as the form creator. Assignment changes the ticket status to In Progress.

VII. **Ticket Status Tracking.** Tracks the current status of each ticket, such as For Client Approval, For Process Owner, Open, In Progress, Resolved, Closed, Rejected, or Reopened.

VIII. **Ticket History.** Maintains a record of significant actions on forms and tickets, including submission, review, approval, assignment, completion, and closure.

IX. **Document Upload and Form Preview.** Enables the upload of the printable PDF template and an optional supporting PDF (up to 25 MB each), and displays submitted

requests in a viewer that shows the answers, including the PAMANA fields, at the positions mapped on the template.

X. **Notifications and Alerts.** Notifies users of pending approvals, new assignments, new messages, pokes, and request updates that need action. Alerts update in real time and open the related request when clicked.

XI. **Role-Based Access Control.** Restricts access to portals and functions according to the user's assigned role.

XII. **Audit Trail.** Records significant user activities in the Activity Logs to provide accountability and support auditing requirements.

XIII. **Messaging.** Provides a floating chat window with a team chat, direct messages, a chat for each request, mentions, and pokes.

XIV. **Dashboard.** Provides a dashboard for each role that displays counts of pending approvals and forms, alerts that need action, and the day's activities.

XV. **Reports and Analytics.** Provides a configurable report for each form that shows the answers of closed tickets as charts or tables, with export.

XVI. **Service Completion and Feedback.** Allows requestors to mark a service as complete, answer the Client Satisfaction Survey, and then close the ticket or reopen the request.

XVII. **System Administration.** Provides the Super Admin with tools to manage users, roles, and permissions, and to switch between portals.

E. Getting Started

I. Log-in / Sign in

1. **Open any web browser** and type support.nationalmuseum.gov.ph (Figure A.1) in the address bar. The STS login page will be displayed (Figure A).
2. **Enter your Username** (Figure A.2) and your Password (Figure A.3). Your password is your PAMANA password. The Show Password icon (Figure A.4) lets you show or hide what you typed.
3. **Tick Remember me** (Figure A.5) if you want to stay signed in on this computer, then click the Sign In button (Figure A.6).

Note: If you have enrolled in MFA, the system asks for the "6-digit code or recovery code" from your authenticator app after you enter your credentials. If the credentials are wrong, the system shows "Incorrect email or password." If the code is wrong, it shows "The authentication code is incorrect."

Note: The STS uses your PAMANA password, so it cannot be changed or reset in the STS. If you cannot sign in, contact your system administrator.

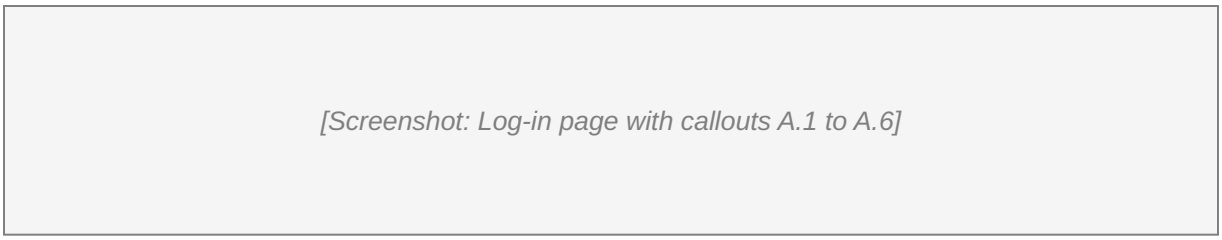

Figure A – Log-in page

II. Dashboard

Upon login, the user will be directed to the Dashboard. The Dashboard serves as the main landing page of the Support Ticketing System (STS). It provides Admin users with an overview of the requests and forms that need attention, and quick access to frequently used functions. The dashboard consists of the following key sections (Figure B):

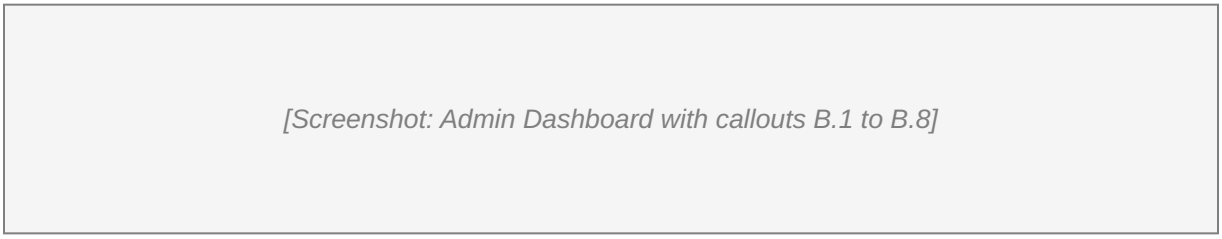

Figure B – Admin Dashboard

1. **Welcome Banner.** The banner greets the signed-in user (for example, Good day, Resty). It shows “You’re all caught up. Manage TA forms and review incoming client requests.” When something needs you, it shows how many requests are waiting for approval and how many forms are pending review with Records. It has two shortcut buttons: Review approvals, which opens the Approvals queue, and Open Form Builder, which opens the Form Builder (Figure B.1).
2. **Summary Cards.** The three cards beside the banner show the current counts. Click a card to open the related page:
    a. **Requests to approve (Client submissions).** The client submissions waiting for your approval (Figure B.2).
    b. **Pending review (Waiting on Records).** The forms you sent that are waiting for the Records review (Figure B.3).
    c. **Draft forms (Not yet submitted).** The forms you saved as drafts and have not yet sent (Figure B.4).
4. **Alerts.** Colored notices appear below the banner when you need to act:
    a. **You have assigned requests.** Shows how many requests were assigned to you, with an Open My Assignments link (Figure B.5).
    b. **Forms need revision.** Shows the forms that Records disapproved, with the Records’ remarks and an Open Form Builder button (Figure B.6).
    c. **Client requests awaiting approval.** Shows the number of requests waiting for approval, with an Open Approvals button (Figure B.7).

4. **Today's activity.** Lists the updates on requests and forms for the day. When there is none yet, it shows "No activity yet today. Updates on requests and forms will show up here." (Figure B.8).
5. **Navigation Menu.** The left-side menu has three groups: MAIN (Dashboard, Reports, Messages), FORMS (Form Builder, Published Forms), and REQUESTS (Approvals, Request Management, Assigned to me, My Requests, Submit Request).
6. **Settings, Set up MFA, and Logout.** At the bottom of the sidebar, Settings opens your account page, Set up MFA turns on multi-factor authentication, and Logout ends your session.
7. **Notifications and Profile Menu.** The bell icon in the top-right header shows system alerts. The profile menu beside it shows your name and your role (Admin).
8. **Chat button.** The round chat button at the bottom-right corner opens the Messages window from any page. A number on the button shows unread messages.

Overall, the Dashboard serves as a central overview and starting point for managing and monitoring forms and requests within the STS.

III. System Navigation

The System Navigation provides Admin users with quick and organized access to the different modules and functions of the Support Ticketing System. It serves as the primary navigation menu, allowing users to move between pages, manage forms, process requests, and access account options (Figure C).

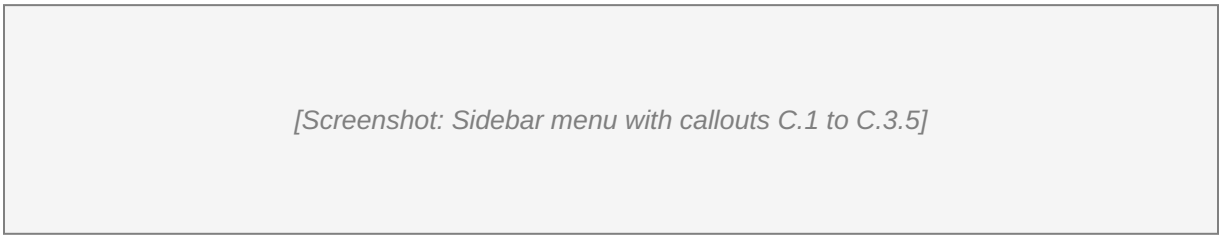

Figure C – System Navigation

1. **Primary Navigation Groups.** Expand the navigation categories in the left sidebar to reveal the modules:
    a. **MAIN.** Access the dashboard, reports, and messaging modules. (Figure C.1)
    b. **FORMS.** Access the Form Builder and the list of published forms. (Figure C.2)
    c. **REQUESTS.** Access the approval queue, ticket management, your assigned tickets, and personal request tools. (Figure C.3)
4. **Main Section Sub-Modules.** Options under the MAIN menu group (Figure C.1):
    a. **Dashboard.** Returns to the summary page showing pending request totals, forms, and today's activity. (Figure C.1.1)
    b. **Reports.** Opens the report of each of your forms, built from the answers of closed tickets, with exportable data. (Figure C.1.2)

c. **Messages.** Opens the Messages chat window for the team chat, direct messages, request chats, and pokes. (Figure C.1.3)

4. **Forms Section Sub-Modules.** Options under the FORMS menu group (Figure C.2):
    a. **Form Builder.** Design and configure a new request form using the six-step wizard. (Figure C.2.1)
    b. **Published Forms.** View the list of forms that Records approved and published, and open their files. (Figure C.2.2)
3. **Requests Section Sub-Modules.** Options under the REQUESTS menu group (Figure C.3):
    a. **Approvals.** Review, approve, or reject the requests awaiting your decision. (Figure C.3.1)
    b. **Request Management.** Monitor the tickets of your forms, view submitted files, and assign personnel. (Figure C.3.2)
    c. **Assigned to me.** Handle the tickets assigned to your account. (Figure C.3.3)
    d. **My Requests.** Track the requests you submitted for yourself. (Figure C.3.4)
    e. **Submit Request.** Select a published form and submit a request for yourself. (Figure C.3.5)

IV. Reports and Analytics Overview

The Reports and Analytics Overview shows the answers of the closed tickets of one of your forms as charts and tables. Each admin decides which chart or table represents each field of the form. Administrators use it to monitor the requests received through their forms (Figure D).

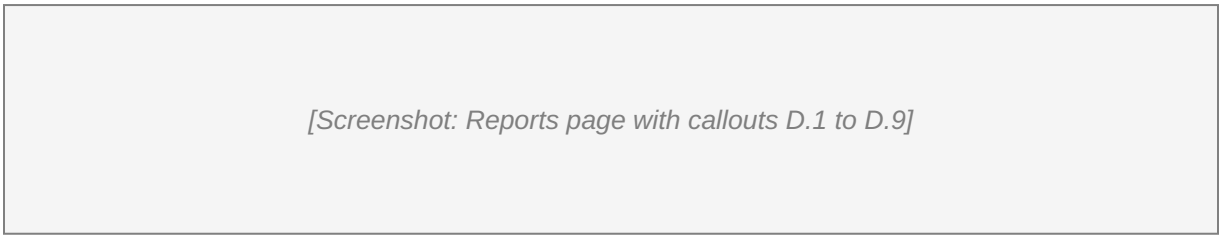

Figure D – Accessing Reports and Analytics Overview

1. **Access the Module.** Navigate to MAIN > Reports in the left navigation menu to open the Reports page (Figure D.1).
2. **Select the Report Filters.** At the top of the page, choose the data to display:
    a. **Form.** Select the form to report on (for example, test). Only your published forms are listed.
    b. **Year.** Select the year (for example, Year 2026).
    c. **Month.** Select a month, or keep All months to include the whole year.

4. **Review the summary line.** Below the filters, a line shows the number of tickets covered by the report (for example, 1 closed ticket). Only closed tickets are counted in the report.
5. **Set up the report (first time for a form).** A form that has no report format yet shows "No available report." Click Report settings (Figure D.2), then:
    a. **Choose a type for each field.** The Report settings window lists every field of the form under Data list, with its field type. In the Type column select Donut chart, Pie chart, Bar chart, Column chart, Number tiles, Table list, or Not shown.
    b. **Click Save** on each row you want to keep. A saved row shows ✓ Saved.
    c. **Click Apply changes.** Rows that were not saved are skipped. The window shows how many fields are saved. You can change the settings at any time.
4. **Review the Report Cards.** The page shows one card for each field you chose to show. Each card displays the answers of the closed tickets only:
    a. **Donut or pie chart.** The center shows the number of tickets, and the legend lists each answer with its count and percentage (for example, Division/Section, Figure D.3).
    b. **Bar or column chart.** Shows the count of each answer as bars.
    c. **Number tiles.** Shows each answer as a tile with its count and percentage.
    d. **Table list.** Lists the most frequent answers, with the columns #, Answer, and Requests (for example, Requestor's Name, Designation, Email Address, Purpose, and Rationale, Figures D.4 to D.9). Only the top five are shown, and the card tells you how many more are not shown.
5. **Scroll down** to see the remaining cards of the form (Figure D.7). If some fields are set to Not shown, a note at the bottom tells you how many are hidden.
6. **Export a Card.** Click Export on a card to download its data. For a table list, choose Picture (top five), Excel (all answers), or PDF (all answers).

V. Managing Real-Time Messages and Group Chat Communications

Messages is a floating chat window for real-time conversations with administrative, records, and client personnel within the STS (Figure E). It is available on every page, so you can chat without leaving what you are doing.

1. **Open Messages.** Click the round chat button at the bottom-right corner of the page, or click MAIN > Messages in the left menu. A number on the button shows how many messages you have not read. Click the X (Close) button in the window to close it.
2. **Review the Chats list.** The Messages window opens on the Chats list (Figure E.1). Use Search chats to find a conversation. Chats are grouped under:
    a. **Team.** The team chat for everyone (for example, NMP Team Chat, accessible by Admin, Records, and Clients).
    b. **Requests.** A chat for each request, so the people working on a ticket can talk about it.

c. **Direct messages.** Private conversations with one person.

4. **Open a conversation.** Click a chat to load its messages (Figure E.2). Messages appear instantly for all participants. The header shows the name of the chat; a request chat also shows the ticket status and the form, with a button that opens the ticket. Click the back arrow to return to the Chats list.
5. **Compose and send a message.** Use the message box at the bottom (Figure E.3):
    a. **Message Box.** Type your text in the box (it shows “Message the NMP team…”, “Message about this request…”, or “Message” followed by the person’s name). Use @ to mention a team member.
    b. **Send.** Click the Send button or press Enter to post the message.
3. **Chat details.** The details panel shows the people in the chat. For a request chat it also shows the form, the division, when it was submitted, and who it is assigned to.

Figure E – Messages window

New Message Threads and Direct Alerts

This procedure details how to find users, start direct messages, and send instant alerts (“pokes”) (Figure F).

1. **Launch the New Message window.** In the Messages window, click New to open the New message window (“Message or poke anyone: admin, records, or client.”).
2. **Search the Recipient Directory.** Locate the person you need:
    a. **Search Field.** Type in the “Search by name, email, or division…” box to filter accounts.
    b. **Directory Categories.** People are listed under Admin and Clients.
3. **Message or Poke.** Choose an option next to the selected person:
    a. **Direct Conversation.** Click the person’s row to open a private conversation.
    b. **Poke.** Click the Poke button beside a person to send an instant alert without opening a chat. You can also click Poke in the header of a direct conversation.

Figure F – New message window

VI. Forms

The Forms group lets Admin users create request forms, submit them for review, and view the forms that have been published.

I. Form Builder

The Form Builder allows Admin users to create and configure a request form in a guided six-step wizard: General, Fields, Print Template, Client Request Approval, Workflow, and Supporting Doc (Figure D). To open it, click FORMS, then Form Builder, in the left sidebar, or click Open Form Builder on the Dashboard. The New request form page shows the six steps and your progress (for example, Step 1 of 6). Click Continue to go to the next step and Back to return to a previous step without losing your entries. Your work in progress is kept for your account, so it is still there if you leave the page and return.

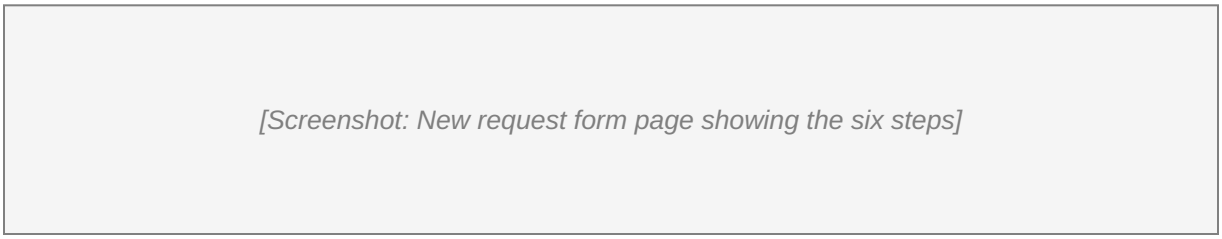

Figure D – Form Builder steps

Step 1 – GENERAL

Enter the general information of the form (Figure E):

a. **Form title.** Enter a title that identifies the purpose of the form, for example Service Request Form / Facility Request.
b. **Reference number.** The system generates it automatically.
c. **Date effectivity.** Select the date from which the form is effective.
d. **Version number.** The first version is v1.0.
e. **Division/Section.** Filled in from your login (your PAMANA section).

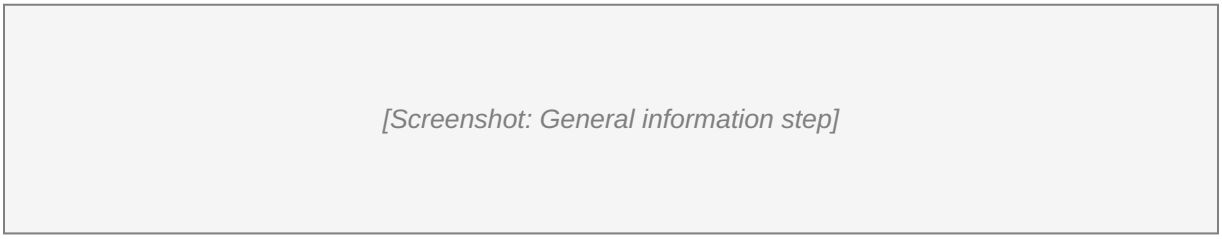

Figure E – General information step

Step 2 – FIELDS

Define the information that requestors must provide (Figures F and G). The Form elements panel on the left lists the field types, the Live preview in the middle shows what employees will see, and the Field settings panel on the right edits the selected field.

a. **Add fields.** Click an element to add it to the Live preview. The available elements are Textbox, Textarea, Dropdown, Checkbox, Radio, Date Picker, Time Picker, Date & Time, File Upload, Email, Number, and Signature.
b. **Set the field properties.** Select a field, then edit its Label and Placeholder (and its Options, for choice fields), and tick Required field if the requestor must complete it. Each field also has a Variable, which identifies the field when it is mapped on the print template.
c. **Arrange the fields.** Drag the rows in the Live preview to put the fields in the order you want.
d. **Continue.** At least one field is required. If the step is incomplete, a short message under the Continue button tells you what is missing.

Figure F – Fields step – form elements

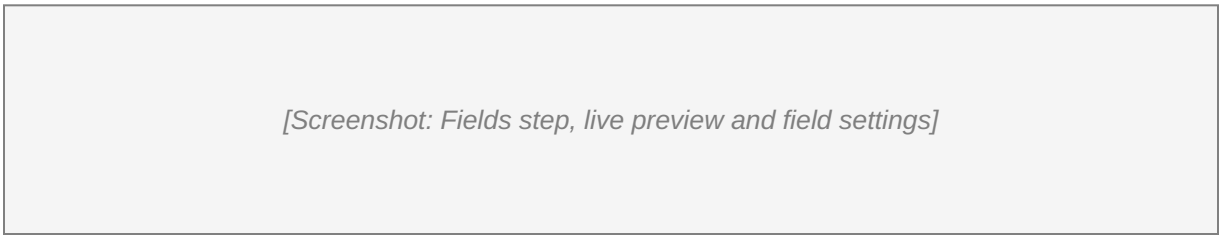

Figure G – Fields step – live preview and field settings

Step 3 – PRINT TEMPLATE

Set up the printable version of the form (Figure H). The step has three parts: Upload form, Place fields, and Save layout.

a. **Upload the template.** Upload the printable PDF form. The maximum file size is 25 MB; only PDF files are accepted. A multi-page PDF is shown with its pages stacked so fields can be mapped on every page. Use Replace to upload a different file.
b. **Place the fields.** Drag each form field from the Fields to place list onto its position on the template. When a request is submitted, the answers, including the PAMANA fields, appear where they were placed.

c. **Save the layout.** Click Save layout (“Layout saved.”) and use Preview to check the alignment, spacing, and presentation of the placed fields.

Figure H – Print Template step (Step 3 of 6)

Step 4 – CLIENT REQUEST APPROVAL

Decide whether a client request needs approval before it reaches the Action Officers (Process Owner) (Figure I). The Live workflow preview shows the resulting order, for example Client → Process Owner.

a. **Recommending Officer.** Choose Yes or No for this approval stage according to the approval process you need.
b. **Immediate Supervisor.** Choose Yes or No for this stage. It can only be turned on while the Recommending Officer stage is on.

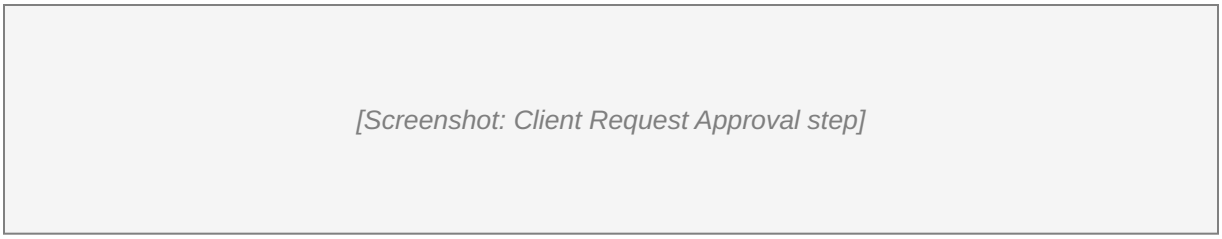

Figure I – Client Request Approval step (Step 4 of 6)

Step 5 – WORKFLOW

Choose the personnel who process the request (Figure J). The list shows the staff of your own section.

a. **Add the Action Officers.** Select the staff name for Action Officer 1 (AO1). Click + to add another Action Officer, or the trash button to remove one.
b. **Set the order.** Use the up and down arrows to arrange the Action Officers in the order in which they approve. The final Action Officer is labeled Request Management and is responsible for assigning personnel; the Live workflow preview ends with Assigned personnel (In Progress).

Figure J – Workflow step (Step 5 of 6)

Step 6 – SUPPORTING DOC

Attach a supporting document to the form (Figure K). This step is optional.

a. **Upload a supporting PDF (optional).** Drop a PDF on the Attachment box or click it to browse, for example an SOP or guidelines that accompany the form. The maximum file size is 25 MB.

Figure K – Supporting Doc step (Step 6 of 6)

SUBMIT THE FORM

After checking all six steps, click Submit to Records on the last step to send the form to the Record Admin for review. To finish it later, click Save as draft instead (drafts do not appear in Records). The form moves through these statuses:

a. **Draft.** Saved but not yet submitted. Counted under Draft forms on the Dashboard.
b. **Pending Review.** Submitted to Records and waiting for the Record Admin's decision. Counted under Pending review on the Dashboard.
c. **Published.** Approved by the Record Admin (Approve & publish) and available under Submit Request.
d. **Disapproved.** Returned to you with remarks from the Record Admin. The Dashboard shows a "forms need revision" alert with the remarks.

II. Published Forms

Click FORMS, then Published Forms, in the left sidebar to see the forms that Records approved and published (Figure L). The header shows the number of published forms (for

example, “1 published form”). When there are none, the page shows “No published forms yet.”

a. **Search forms.** Type in the Search forms box to find a form by its title or reference number. If nothing matches, the page shows “No forms match your search.”
b. **Forms table.** Shows the Form title, Ref (reference number), Effectivity, and Version.
c. **View file.** Click View file in the Action column to preview the form’s uploaded template.

Figure L – Published Forms

Note: Request volume and answers per form are reported under MAIN > Reports.

VII. Approvals

Approvals is the review queue where you handle the requests that need your decision (Figure N). When a form uses an Action Officer workflow, the approvals are done in sequence, and the request is then ready for personnel assignment. To open it, click REQUESTS, then Approvals, in the left sidebar.

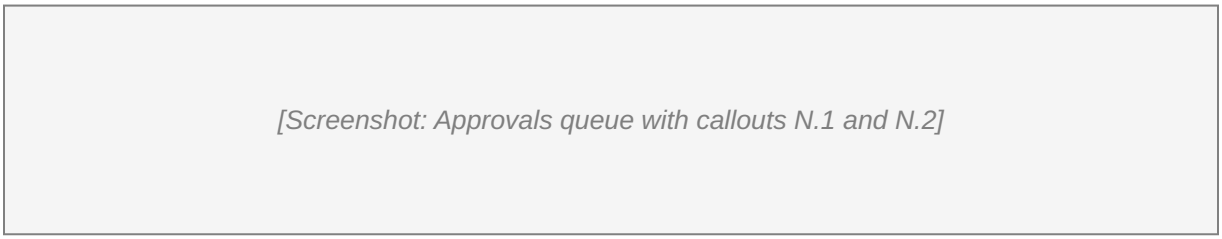

Figure N – Managing Approvals

1. **Access the Approvals Queue.** Navigate to REQUESTS > Approvals in the left navigation menu.
2. **Review the Pending Approvals Table.** Inspect the submitted client requests (Figure N.1):
    a. **Total Counter.** The number of items requiring review appears in the header (for example, 0 pending approvals). When there are none, the page shows “No pending approvals. New client requests will appear here for your review.”
    b. **TICKET.** The ticket number; click it to open the request.
    c. **CLIENT.** The name of the submitting client.
    d. **DIVISION.** The division or section that submitted the request.

e. **STATUS.** The current stage of the request. A request that finished all approvals shows Ready to assign.

f. **ACTION.** The buttons you can use on that request (see step 3).

7. **Take action on a request.** Under ACTION:

a. **View file.** Opens a read-only preview of the submitted form so you can review it first.

b. **Approve.** Approves the request at your stage. The ticket moves to the next stage in the chain.

c. **Reject.** Opens the Reject request window. Enter the Reason for rejection (required) and confirm. The requestor can see the reason.

d. **Assign.** Shown instead of Approve when the request has finished all approvals and is ready for assignment. It opens the request page (see Request Management).

5. **Refresh and Navigate.** Click Refresh (Figure N.2) in the upper right corner to load the latest submissions. Click View all requests → at the bottom left to go to Request Management.

Note: You see the Approve, Reject, or Assign buttons only when it is your turn in the workflow. New requests also appear in the notification bell, and you are notified when a request changes.

VIII. Requests / Request Management

The Requests group contains the queues for processing requests and the tools for submitting your own. As a request moves through the workflow, its ticket shows one of the following statuses:

Status	Meaning
For Client Approval	The request is with the Recommending Officer or Immediate Supervisor, when the form requires that review.
For Process Owner	The request is with the Action Officer chain.
Pending Approval	The request is still waiting for an approval step.
Open	The request is active and ready for assignment or processing.
Rejected	The request was rejected with a reason.
In Progress	Personnel were assigned and the work is ongoing.
Pending	A holding status that you can set while the work is waiting.
Resolved	The requestor clicked Mark service complete.

Closed	The requestor clicked Close ticket after submitting feedback.
Reopened	The requestor clicked Reopen request.

> **Note:** Approving a step does not leave the ticket in an “Approved” status. The screen shows the next status in the chain, such as For Client Approval, For Process Owner, or Open, until the assignment sets the status to In Progress.

Request Management lets you assign personnel after Action Officer approval and track requests through resolution. It is the central queue to monitor active tickets, review submission details, and manage request actions (Figure O).

[Screenshot: Request Management with callouts O.1 and O.2]

Figure O – Request Management and Assignment

1. **Access Request Management.** Navigate to REQUESTS > Request Management in the left navigation menu.
2. **Review the Master Request Table.** Inspect the tickets of your forms (callout 1):
    a. **Header Summary Counter.** The total number of requests (for example, 1 request). When there are none, the page shows “No requests yet.”
    b. **TICKET.** The ticket number and title.
    c. **CLIENT.** The full name of the submitting user.
    d. **DIVISION.** The originating division or section.
    e. **STATUS.** The current status of the ticket (for example, Closed).
6. **Execute Ticket Actions.** Use the buttons under the ACTION column (callout 2):
    a. **View file.** Opens a read-only preview of the submitted form and any attached files.
    b. **Manage →.** Opens the request page, described below.

The Request Page (Manage)

The request page shows the ticket number and title, the status, the client, and the division, with the full request details on the left. The panels on the right depend on the stage of the ticket (Figure P):

a. **Request messages.** Opens the chat of this request in the Messages window.
b. **Approve or reject.** Shown when it is your turn to approve. Click Approve request, or type a Rejection reason and click Reject request.

c. **Task assignment.** Shown when the request is ready for assignment. Select a person from Personnel (your section) and click Assign. The ticket becomes In Progress and the person is notified.

d. **Update status.** After assignment, set the ticket to in progress or pending. When the work is done, the client marks the service complete; the page then shows “Waiting for client” until the client submits feedback and closes the ticket.

Figure P – Request page

Request File Preview

1. **Selecting View file** from a list opens a read-only preview window of the generated request form together with any attached files (Figure Q).
2. **The viewer has toolbar controls** to zoom out or in (– / +), check the scale percentage, or Reset the view. Scroll through the preview to verify the submitted information, then close the window with the X button to return to the list.

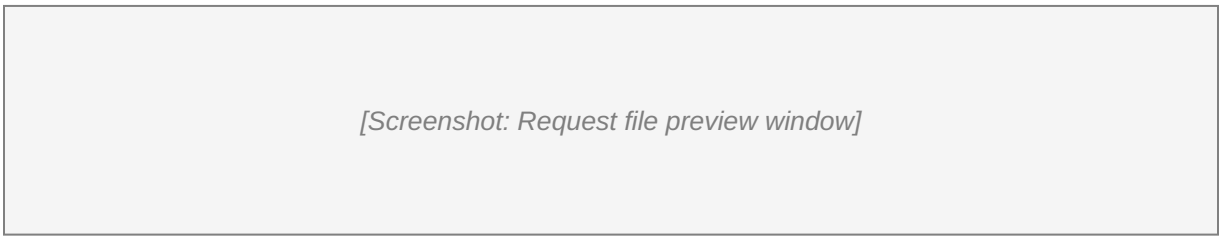

Figure Q – Request File Preview

IX. Assigned To Me

Assigned to me is your personal work queue. It lists the tickets that were assigned to your account, so you can follow up on them and complete the work (Figure R). To open it, click REQUESTS, then Assigned to me, in the left sidebar. A badge on the menu shows how many tickets are assigned to you, and you are notified when a ticket is assigned to you.

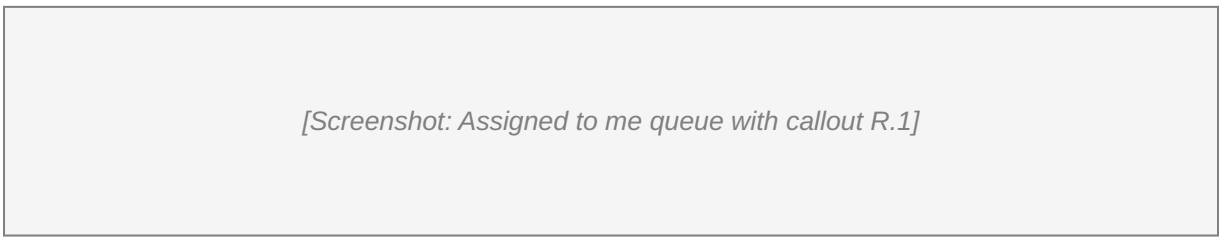

Figure R – Assigned to me queue

This procedure outlines the workflow for processing the service tickets assigned to you.

1. **Access the Personal Queue.** Navigate to REQUESTS > Assigned to me in the left navigation menu.
2. **Review Active Ticket Assignments.** Monitor the tasks in the work table (callout 1):
    a. **Header Summary Counter.** The number of active assignments (for example, 0 active assignments). When there are none, the page shows “No assigned requests. When an admin assigns you to a request, it will appear here as In Progress.”
    b. **TICKET.** The ticket number and title.
    c. **CLIENT.** The name of the client who submitted the request.
    d. **CLIENT DIVISION.** The division or section that submitted the request.
    e. **STATUS.** The current progress of the ticket (for example, In Progress).
    f. **ACTION.** View file previews the submitted form; Open → opens the request page.
7. **Process and Close Assigned Tickets.** Carry out the work as requested:
    a. Perform the technical support or administrative task requested.
    b. On the request page, use Update status to set the ticket to in progress or pending as the work proceeds. Use Request messages to chat with the people involved.
    c. **When the work is complete, the client marks the service complete,** submits the feedback, and closes the request.

X. My Requests

My Requests lets you track the requests that you submitted for yourself (Figure S). To open it, click REQUESTS, then My Requests, in the left sidebar.

[Screenshot: My Requests page with callouts S.1 and S.2]

Figure S – Personal Requests and Self-Service Submissions

1. **Requests Table.** The header shows the number of requests (for example, 0 requests). The table shows the Ticket, Form, Status, Assigned to, Submitted date, and Action (Figure S.1). When you have no requests yet, the page shows “No personal requests yet.”
2. **Next step link.** The Action column shows the next step for the ticket: Mark complete →, Submit feedback →, or Close request →.

3. **Open a request.** Click a ticket to see the uploaded form, the submitted answers, the assigned personnel, and the requestor actions. When the work is done:
    a. Click Mark service complete.
    b. Submit your feedback in the Client Satisfaction Survey.
    c. **Then click Close ticket,** or Reopen request if you are not satisfied.
4. **New request.** Click New request (upper right) to open the Submit Request page (Figure S.2). When you have no requests yet, you can also click the Submit request button in the table panel.

XI. Submit Request

Submit Request lets you create a request for yourself by choosing a published form. The request appears in your own list (Figure T). To open it, click REQUESTS, then Submit Request, in the left sidebar. Click Back to my requests at the top to return to your list.

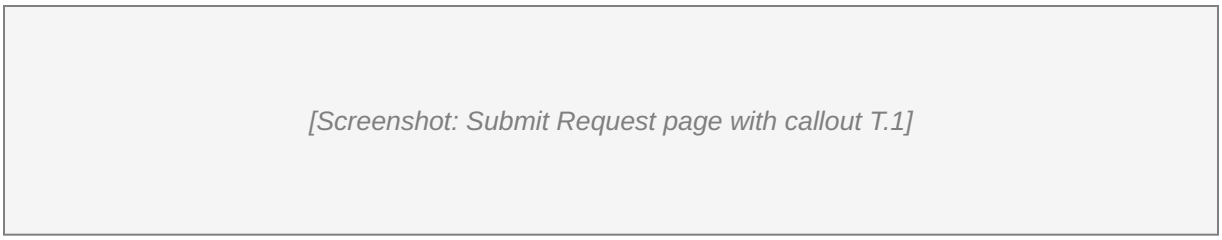

Figure T – Submit Request

1. **Access the Submit Request Workspace.** Navigate to REQUESTS > Submit Request in the left navigation menu. The page shows “Submitting as” followed by your name.
2. **Select a Published Form.** In the Choose a form panel (callout 1), click the Select a form… dropdown to display the published forms, then select the form you need (for example, Technical Assistance Request Form). Its fields load. If no form is available, the page shows “No forms available. Published TA forms will appear here when Records approves them.”
3. **Review the requestor details.** Your requestor details (Division/Section, Designation, First name, Middle name, Last name, and Email) are filled in automatically from PAMANA and placed on the form when you submit.
4. **Fill and Submit the Request.** Complete the fields once the form loads:
    a. Enter the required service details. Fill in at least one field before submitting.
    b. Upload supporting files if the form requires them. Only PDF files are accepted.
    c. **Click Submit request.** The request is routed into its approval workflow and the ticket is logged under your My Requests list.

XII. Settings and Account Profile

This procedure details how to update your profile and set up multi-factor authentication. Click Settings at the bottom of the sidebar to open the Settings page (Figure U).

1. **Update Account Profile Parameters.** These details appear in your portal header and in the activity logs. Review and modify them within the Account section:
    a. **Email.** Displays your registered official email address (for example, resty.morancil@nationalmuseum.gov.ph). (Figure U.1)
    b. **Role.** Displays your assigned role (for example, Admin). (Figure U.2)
    c. **Display name.** Update or verify your name. (Figure U.3)
    d. **Division / office.** Update or verify your organizational unit (for example, INFORMATION AND COMMUNICATIONS TECHNOLOGY SECTION). (Figure U.4)
    e. **Designation.** Update or verify your official job title (for example, Information Technology Officer I). (Figure U.5)
    f. **Save profile.** Click Save profile to store the updated details. The display name and division are required. (Figure U.6)
7. **Password.** The Password section explains that your sign-in password is your PAMANA password. The STS cannot change it. Change your password in PAMANA, then use the new password to sign in to the STS. (Figure U.7)
8. **Set up MFA.** Click Set up MFA at the bottom of the sidebar to open the Multi-factor authentication (MFA) window:
    a. **Enter your Current password** and click Set up MFA to start.
    b. **Scan the code** with your authenticator app (or type the Setup key) and save your Recovery codes.
    c. **Enter the Code from the app** and click Confirm and enable. From then on, signing in asks for the 6-digit code.
    d. **Once MFA is on,** the same window lets you generate New recovery codes or Disable MFA.

XIII. Daily Activity

The Daily Activity of an Admin user is monitored from the Dashboard cards, alerts, and Today's activity panel, the Approvals and Request Management queues, Assigned to me,

Messages, and the notification bell in the top bar. Click the notification bell to see the items that need your attention, such as client requests waiting for your approval, requests assigned to you, new messages, and pokes. Click an item to open the related request or chat. Request changes also appear as notices without reloading the page.

Appendix A: Approvals

The undersigned acknowledge that they have reviewed the User Manual and agree with the information presented within this document. Changes to this User Manual will be coordinated with, and approved by, the undersigned, or their designated representatives.
