INTRODUCTION

A. Overview

The Support Ticketing System (STS) is a centralized platform designed to streamline the creation, review, publication, submission, approval, assignment, monitoring, and completion of staff support and service requests within the National Museum of the Philippines (NMP). It provides Admin users, Record Admin users, and Staff users with the tools needed to build request forms, submit requests, and track each request from submission to final closure.

This manual serves as a guide for Admin users in using the Support Ticketing System. It covers the core functionalities of the platform, including logging in and navigating the dashboard, creating request forms (Form Builder and Published Forms), approving and managing requests (Approvals, Request Management, and Assigned to me), submitting personal requests (Submit Request and My Requests), using Reports and Messages, and managing account settings.

The STS aims to improve efficiency, accountability, and transparency in handling staff requests by reducing manual paperwork, minimizing processing delays, and providing a clear audit trail for every form and ticket processed within the system. Employee information such as name, email address, designation, division, and section is filled in automatically from PAMANA. This manual is intended for Admin users responsible for building forms and processing requests.

B. Objectives

The Support Ticketing System (STS) of the National Museum of the Philippines (NMP) aims to provide a centralized and efficient platform for managing, monitoring, and tracking staff support and service requests within the organization. The system will improve request visibility, accountability, processing efficiency, and timely action by authorized personnel and offices.

The STS makes the creation, review, submission, approval, assignment, and monitoring of requests easier and more organized. It helps users quickly check the status of their requests, reduces delays, and keeps a clear record of ticket transactions. The system also supports different types of staff support and service requests through configurable forms, and provides reports and updates that help offices monitor pending and completed requests.

C. User’s Role, Access and Permission

I. **Super Admin** has the highest level of system access and is responsible for overall system administration, including managing users, roles, and permissions. The Super Admin can open the Admin, Record Admin, and Staff portals with a single account and switch between them without signing out.

II. **Admin** is assigned to Section Heads of the ODG Section and the Regional Component Museums, and to Division Heads of all other divisions. Admin users create request forms in the Form Builder and submit them to Records, and monitor them under Published Forms and Reports. They review, approve, or reject requests at the applicable workflow stages, assign personnel to tickets, monitor their assigned work, and may submit personal requests through Submit Request.

III. **Record Admin** reviews and manages the forms that Admin users submit for publication. The Record Admin monitors Pending Forms and Published Forms, reviews form configurations, approves and publishes forms or disapproves them with remarks, and monitors activities through the Activity Logs.

IV. **Staff (Client)** are museum employees who submit requests using published forms and monitor them under My Requests. When designated as a Recommending Officer, Immediate Supervisor, or Action Officer, Staff users also review requests in their For Review queues. Depending on the workflow, they may mark a service as complete, submit the Client Satisfaction Survey, and close or reopen a request.

D. System Features

I. **Form Builder.** Allows Admin users to create request forms through a guided six-step wizard (General, Fields, Print Template, Client Request Approval, Workflow, and Supporting Doc) and to submit them to Records for review.

II. **Form Information Management.** Records essential details of each form, including the title, reference number, effectivity date, version number, fields, printable template, supporting document, and status (Draft, Pending Review, Published, or Disapproved).

III. **Form Review and Publishing.** Allows Record Admin users to review submitted forms and either approve and publish them or disapprove them with remarks. Only published forms are available for request submission.

IV. **Request Submission.** Allows users to select a published form, fill in the required fields, have their employee information filled in automatically from PAMANA, preview the form, and submit the request.

V. **Request Approval.** Routes each request through the approval stages configured on the form. A request approved at the final stage becomes Open, while a rejection requires a reason that is provided to the requestor.

VI. **Personnel Assignment.** Allows Admin users, or the last Action Officer in a configured workflow, to assign Open tickets to active Admin personnel from the same division as the form creator. Assignment changes the ticket status to In Progress.

VII. **Ticket Status Tracking.** Tracks the current status of each ticket, such as For Client Approval, For Process Owner, Open, In Progress, Resolved, Closed, Rejected, or Reopened.

VIII. **Ticket History.** Maintains a record of significant actions on forms and tickets, including submission, review, approval, assignment, completion, and closure.

IX. **Document Upload and Form Preview.** Enables the upload of the printable PDF template and an optional supporting PDF (up to 25 MB each), and displays submitted

requests in a viewer that shows the answers, including the PAMANA fields, at the positions mapped on the template.

X. **Notifications and Alerts.** Notifies users of pending approvals, forms awaiting review, new messages, pokes, and request updates that need action.

XI. **Role-Based Access Control.** Restricts access to portals and functions according to the user's assigned role.

XII. **Audit Trail.** Records significant user activities in the Activity Logs to provide accountability and support auditing requirements.

XIII. **Messaging.** Provides real-time group chats, direct messages, mentions, and pokes to help users coordinate on requests.

XIV. **Dashboard.** Provides a dashboard for each role that displays counts and lists of pending approvals, draft and pending forms, published forms, and recent activities.

XV. **Reports and Analytics.** Provides per-form reports of closed tickets and a My Forms report of request volume by division and service category.

XVI. **Service Completion and Feedback.** Allows requestors to mark a service as complete, answer the Client Satisfaction Survey, and then close the ticket or reopen the request.

XVII. **System Administration.** Provides the Super Admin with tools to manage users, roles, and permissions, and to switch between portals.

E. Getting Started

I. Log-in / Sign in

1. **Open any web browser** and type support.nationalmuseum.gov.ph (Figure A.1) in the address bar. The STS login page will be displayed (Figure A).
2. **Enter a valid Username** (Figure A.2) and Password (Figure A.3). The Show Password icon (Figure A.4) allows you to show or hide the entered password for verification. Then click the Sign In button (Figure A.6) to proceed.
3. **Forgot password?** (Figure A.5). The system displays the message "Contact your system administrator to reset your password." because the password is the PAMANA password and cannot be reset in the STS.

Note: If the user has enrolled in MFA, the system will automatically ask for the authentication code, and the user will be required to enter the 6-digit code generated by their authenticator app (or a recovery code). If the credentials are incorrect, the system displays "Incorrect email or password."

[Screenshot: Log-in page with callouts A.1 to A.6]

Figure A – Log-in page

II. Dashboard

Upon login, the user will be directed to the Dashboard. The Dashboard serves as the main landing page of the Support Ticketing System (STS). It provides Admin users with an overview of the requests and forms that need attention, and quick access to frequently used functions. The dashboard consists of the following key sections (Figure B):

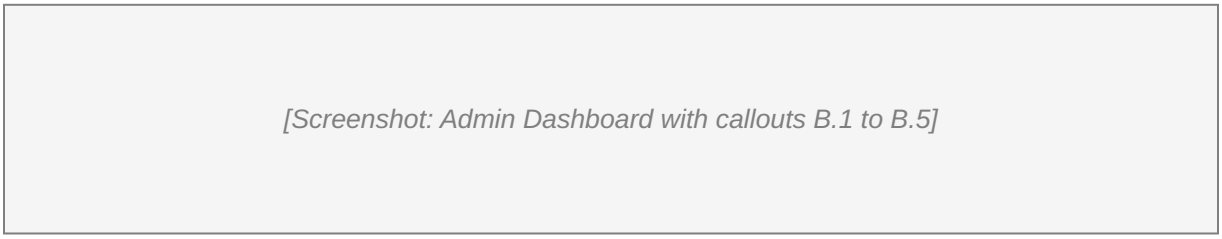

Figure B – Admin Dashboard

1. **Welcome Banner.** The banner greets the signed-in user (Good day, Resty). It has two shortcut buttons: Review approvals, which opens the Approvals queue, and Open Form Builder, which opens the Form Builder (Figure B.1).
2. **Summary Cards.** The three cards beside the banner show the current counts:
    a. **Requests to approve (Client submissions).** The client submissions waiting for your approval (Figure B.2).
    b. **Pending review (Waiting on Records).** The forms you sent that are waiting for the Records review (Figure B.3).
    c. **Draft forms (Not yet submitted).** The forms you saved as drafts and have not yet sent (Figure B.4).
4. **Today's activity.** Lists the updates on requests and forms for the day. When there is none yet, it shows "No activity yet today. Updates on requests and forms will show up here." (Figure B.5).
5. **Navigation Menu.** The left-side menu has three groups: MAIN (Dashboard, Reports, Messages), FORMS (Form Builder, Published Forms), and REQUESTS (Approvals, Request Management, Assigned to me, My Requests, Submit Request).
6. **Settings, Set up MFA, and Logout.** At the bottom of the sidebar, Settings opens your account page, Set up MFA turns on multi-factor authentication, and Logout ends your session.
7. **Notifications and Profile Menu.** The bell icon in the top-right header shows system alerts. The profile menu beside it shows your name and your role (Admin).

Overall, the Dashboard serves as a central overview and starting point for managing and monitoring forms and requests within the STS.

III. System Navigation

The System Navigation provides Admin users with quick and organized access to the different modules and functions of the Support Ticketing System. It serves as the primary

navigation menu, allowing users to move between pages, manage forms, process requests, and access account options (Figure C).

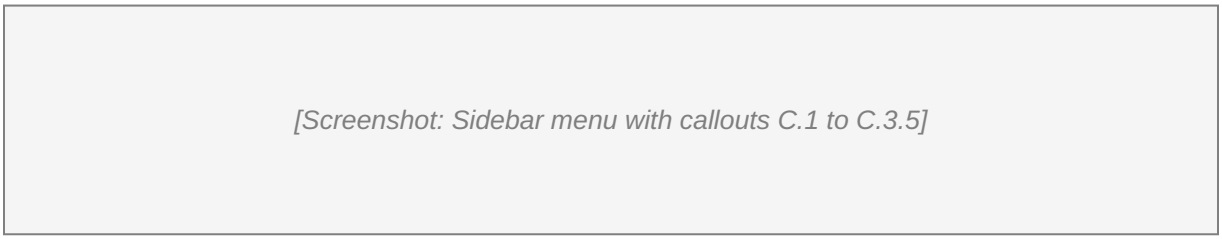

Figure C – System Navigation

1. **Primary Navigation Groups.** Expand the navigation categories in the left sidebar to reveal the modules:
    a. **MAIN.** Access the dashboard, reports, and messaging modules. (Figure C.1)
    b. **FORMS.** Access the Form Builder and the list of published forms. (Figure C.2)
    c. **REQUESTS.** Access the approval queue, ticket management, your assigned tickets, and personal request tools. (Figure C.3)

4. **Main Section Sub-Modules.** Options under the MAIN menu group (Figure C.1):
    a. **Dashboard.** Returns to the summary page showing pending request totals, forms, and today's activity. (Figure C.1.1)
    b. **Reports.** Opens the per-form reports and the My Forms report, with exportable data. (Figure C.1.2)
    c. **Messages.** Opens the real-time group chat, direct messages, and pokes. (Figure C.1.3)

4. **Forms Section Sub-Modules.** Options under the FORMS menu group (Figure C.2):
    a. **Form Builder.** Design and configure a new request form using the six-step wizard. (Figure C.2.1)
    b. **Published Forms.** View the forms that have been approved and published by Records. (Figure C.2.2)

3. **Requests Section Sub-Modules.** Options under the REQUESTS menu group (Figure C.3):
    a. **Approvals.** Review, approve, or reject the requests awaiting your decision. (Figure C.3.1)
    b. **Request Management.** Monitor the tickets of your forms, view submitted files, and assign personnel. (Figure C.3.2)
    c. **Assigned to me.** Handle the tickets assigned to your account. (Figure C.3.3)
    d. **My Requests.** Track the requests you submitted for yourself. (Figure C.3.4)
    e. **Submit Request.** Select a published form and submit a request for yourself. (Figure C.3.5)

IV. Reports and Analytics Overview

The Reports and Analytics Overview provides a summary of request volume and client answers across the Support Ticketing System (STS) workflow. Administrators use it to monitor the requests received through their forms. The Reports page has two parts: the form report (Figure D) and the My Forms report (Figure L).

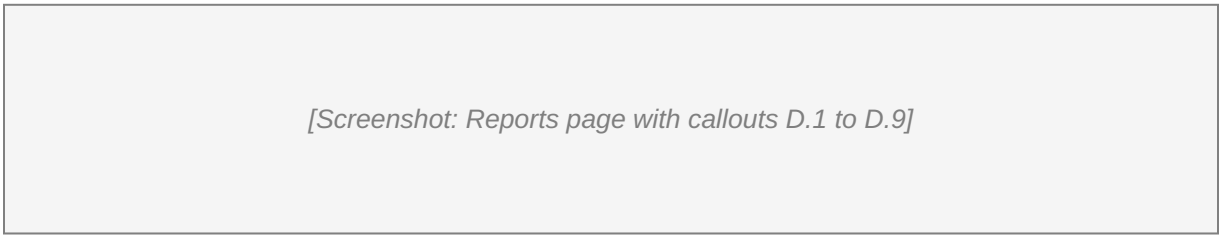

Figure D – Accessing Reports and Analytics Overview

1. **Access the Module.** Navigate to MAIN > Reports in the left navigation menu to open the Reports page (Figure D.1).
2. **Select the Report Filters.** At the top of the page, choose the data to display:
    a. **Form.** Select the form to report on (for example, test).
    b. **Year.** Select the year (for example, Year 2026).
    c. **Month.** Select a month, or keep All months to include the whole year.
4. **Review the summary line.** Below the filters, a summary line shows the number of tickets covered by the report (for example, 1 closed ticket). Only closed tickets are counted in the report.
5. **Report Settings.** Click Report settings to adjust the report (Figure D.2).
6. **Review the Report Cards.** The page shows one card for each field of the selected form. Each card displays the answers of the closed tickets only:
    a. **Division/Section.** Shown as a donut chart. The center shows the number of tickets, and the legend lists each division or section with its count and percentage (Figure D.3).
    b. **Requestor's Name.** Lists the most frequent requestors, with the columns #, Answer, and Requests (Figure D.4).
    c. **Designation.** Lists the most frequent designations of the requestors (Figure D. 5).
    d. **Email Address.** Lists the most frequent email addresses (Figure D.6).
    e. **Purpose.** Lists the most frequent answers to the Purpose field (Figure D.8).
    f. **Rationale.** Lists the most frequent answers to the Rationale field (Figure D.9).
7. **Scroll down** to see the remaining cards of the form (Figure D.7).
8. **Export a Card.** Each card has an Export button that downloads the data of that card.

My Forms Report

The My Forms report gives an overview of the requests received through your forms, including the division and service category distributions and quick insights.

Figure L – My Forms report overview

1. **Set the reporting period.** Use the date range selector at the top (for example, Sep 1, 2026 – Sep 22, 2026).
2. **Review Core Performance Indicators.** Examine the metrics in the top card panel (Figure L.1):
    a. **Total Requests.** Total form submissions received, including the month-over-month change (for example, +100% vs last month).
    b. **Total Divisions / Sections.** The number of divisions or sections that filed requests.
    c. **Most Requested Service.** The form with the most requests and its percentage share of the total.
    d. **Requests This Month.** The number of requests received in the current calendar month.
5. **Analyze Distribution and Usage Breakdown.** Evaluate the request patterns across the charts (Figure L.1):
    a. **Requests by Division / Section.** Horizontal bars showing the volume per submitting office.
    b. **Requests by Service Category.** A donut chart and legend showing the share of each service type.
3. **Review Quick Insights.** The right-hand Quick Insights panel shows the Most Active Division, Most Requested Service, Fastest Growing, Top Service Share, and Avg Requests / Day.
4. **Track Monthly Request Trends.** The Monthly Request Trend line graph shows the 12-month trend. Hover over a point to see the exact count for that month (Figure M.1).
5. **Review Division Ranking Metrics.** The Top Requesting Divisions / Sections table lists DIVISION / SECTION, REQUESTS, and the % share of the total (Figure M.2).
6. **Review the Form Cards.** Each form card shows the form name, form ID (for example, FRM-2026-MJC34RGZF19X), status badge (for example, Published), number of submissions, and last submission date (Figure M.3). Select View to preview the form layout, or Chart to open the analytics of that form.

V. Managing Real-Time Messages and Group Chat Communications

This procedure outlines the steps for using the messaging module to take part in real-time group conversations, direct messages, and mentions with administrative, records, and client personnel within the STS (Figure E).

1. **Access the Messages Interface.** Navigate to MAIN > Messages in the left navigation menu to open the real-time communications workspace.
2. **Manage Chat Conversations.** Use the left-hand Chats pane to select or start a conversation:
    a. **Select + New** to start a new direct message. (Figure E.1)
    b. **Conversation List.** Choose a channel from the list (for example, NMP Team Chat, accessible by Admin, Records, and Clients) to load the discussion. (Figure E.2)
3. **Review the Conversation Thread.** Messages appear instantly to all participants in the message history pane. (Figure E.3)
4. **Compose and Send Messages.** Use the message composer:
    a. **Message Box.** Type your text into the “Message the NMP team…” field. Use @ to mention a team member or role. (Figure E.4)
    b. **Send.** Click the Send button (or press Enter) to post the message. (Figure E.5)

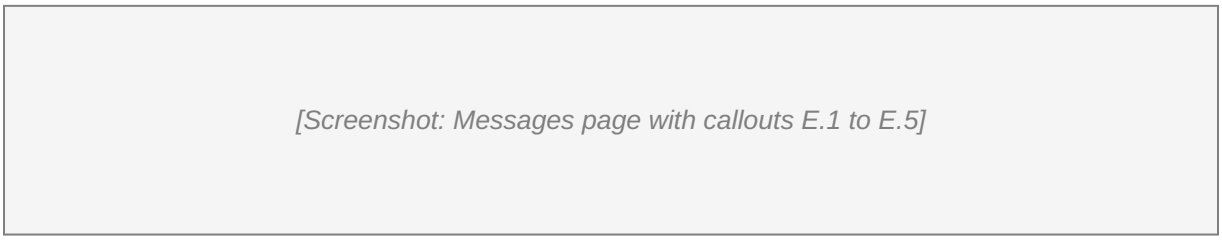

Figure E – Managing Real-Time Messages and Group Chat Communications

New Message Threads and Direct Alerts

This procedure details how to find users, start direct messages, and send instant alerts (“pokes”) (Figure F).

1. **Launch the New Message Interface.** Navigate to MAIN > Messages and click + New to open the New message window.
2. **Search the Recipient Directory.** Locate the person you need:
    a. **Search Field.** Type in the “Search by name, email, or division…” box to filter accounts.
    b. **Directory Categories.** Accounts are grouped under ADMIN and CLIENTS.
3. **Message or Poke.** Choose an option next to the selected user:
    a. **Direct Conversation.** Select a user’s row to open a private conversation with that person.

b. **Poke.** Click the Poke button beside a user to send an instant priority alert without opening a chat.

Figure F – New Message Threads and Direct Alerts

VI. Forms

The Forms group lets Admin users create request forms, submit them for review, and view the forms that have been published.

I. Form Builder

The Form Builder allows Admin users to create and configure a request form in a guided six-step wizard: General, Fields, Print Template, Client Request Approval, Workflow, and Supporting Doc (Figure D). To open it, click FORMS, then Form Builder, in the left sidebar, or click Open Form Builder in the dashboard banner. The New request form page shows the six steps and your progress (for example, Step 1 of 6). Click Back to return to a previous step without losing your entries.

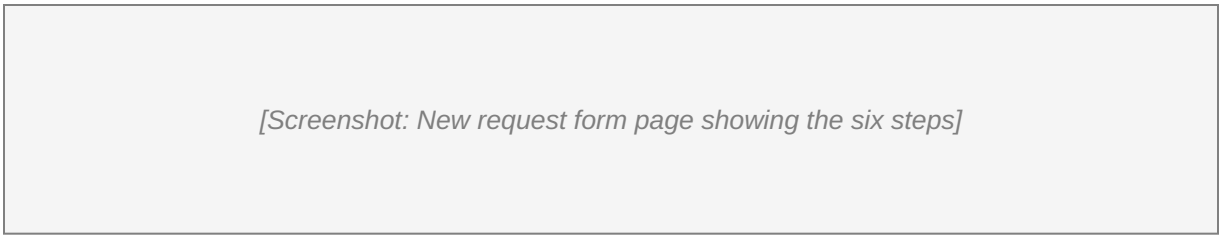

Figure D – Form Builder steps

Step 1 – GENERAL

Enter the general information of the form (Figure E):

a. **Form title.** Enter a title that identifies the purpose of the form, for example Service Request Form / Facility Request.
b. **Reference number.** The system generates it automatically.
c. **Date Effectivity.** Select the date from which the form is effective.
d. **Version number.** The first version is v1.0.
e. **Division/Section.** Filled in from your login.

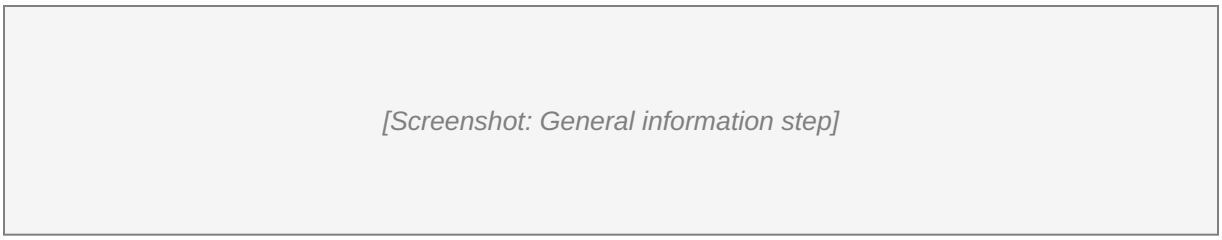

Figure E – General information step

Step 2 – FIELDS

Define the information that requestors must provide (Figures F and G). The Form elements panel on the left lists the field types, the Live preview in the middle shows what employees will see, and the Field settings panel on the right edits the selected field.

a. **Add fields.** Click an element to add it to the Live preview. The available elements are Textbox, Textarea, Dropdown, Checkbox, Radio, Date Picker, Time Picker, Date & Time, File Upload, Email, Number, and Signature.
b. **Set the field properties.** Select a field, then edit its Label and Placeholder, and tick Required field if the requestor must complete it. Each field also has a Variable, which identifies the field when it is mapped on the print template.
c. **Arrange the fields.** Drag the rows in the Live preview to put the fields in the order you want.
d. **Continue.** At least one field is required. If the form has none, the system shows “Add at least one form field before continuing.”

Figure F – Fields step – form elements

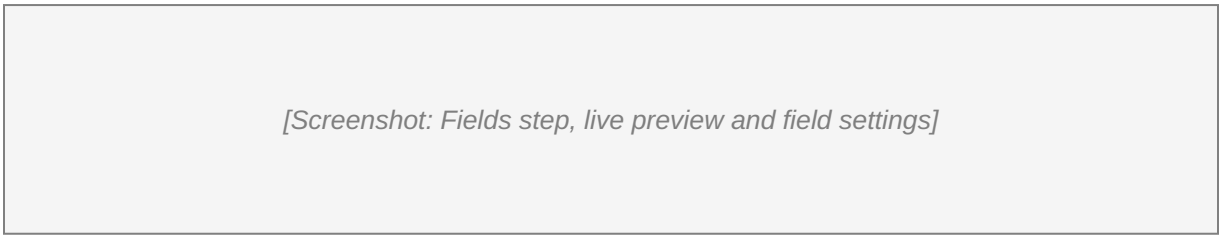

Figure G – Fields step – live preview and field settings

Step 3 – PRINT TEMPLATE

Set up the printable version of the form (Figure H):

a. **Upload the template.** Upload the printable PDF form. The maximum file size is 25 MB. A multi-page PDF is shown with its pages stacked so fields can be mapped on every page.
b. **Map the fields.** Place each form field at its position on the template. When a request is submitted, the answers, including the PAMANA fields, appear where they were mapped.
c. **Review the template.** Check the alignment, spacing, and presentation of the mapped fields.

Figure H – Print Template step (Step 3 of 6)

Step 4 – CLIENT REQUEST APPROVAL

Decide which approvals are needed before the request reaches the Action Officers (Figure I):

a. **Recommending Officer.** Turn this approval stage on or off according to the approval process you need.
b. **Immediate Supervisor.** Turn this stage on or off. It can only be turned on while the Recommending Officer stage is on.

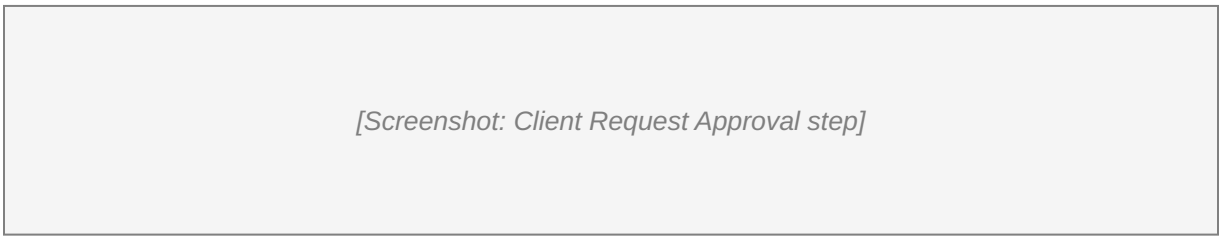

Figure I – Client Request Approval step (Step 4 of 6)

Step 5 – WORKFLOW

Choose the personnel who process the request (Figure J):

a. **Add the Action Officers.** Add the personnel who will handle the request.
b. **Set the order.** Arrange the Action Officers in the order in which they process the request. The final Action Officer is responsible for request management and personnel assignment.

Figure J – Workflow step (Step 5 of 6)

Step 6 – SUPPORTING DOCUMENT

Attach a supporting document and describe any attachments requestors must provide (Figure K):

a. **Upload a supporting PDF (optional).** The maximum file size is 25 MB.
b. **Add instructions.** Describe the documents that requestors must attach, where applicable.

Figure K – Supporting Doc step (Step 6 of 6)

SUBMIT THE FORM

After checking all six steps, submit the form to Records for review, or save it as a draft to finish it later. The form moves through these statuses:

a. **Draft.** Saved but not yet submitted. Counted under Draft forms on the dashboard.
b. **Pending Review.** Submitted to Records and waiting for the Record Admin's decision.
c. **Published.** Approved by the Record Admin (Approve & publish) and available under Submit Request.
d. **Disapproved.** Returned to the Admin with remarks from the Record Admin.

II. Published Forms

Click FORMS, then Published Forms, in the left sidebar to see the forms that have been approved and published. Use the search box to find a form by name. The header shows the number of published forms (for example, "1 published form"). When there are none, the page shows "No published forms yet."

> **Note:** Request volume per form and per division is reported under MAIN > Reports.

VII. Approvals

Approvals is the review queue where you handle the requests that need your decision (Figure N). When a form uses an Action Officer workflow, the approvals are done in sequence, and the request is then ready for personnel assignment in Request Management. To open it, click REQUESTS, then Approvals, in the left sidebar.

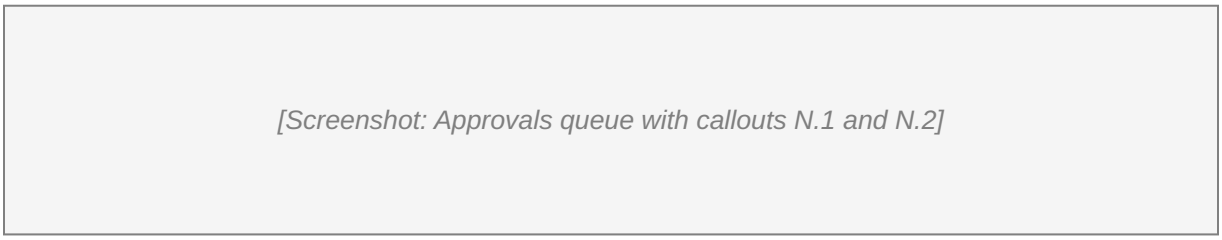

Figure N – Managing Approvals

1. **Access the Approvals Queue.** Navigate to REQUESTS > Approvals in the left navigation menu.
2. **Review the Pending Approvals Table.** Inspect the submitted client requests awaiting your decision (Figure N.1):
    a. **Total Counter.** The number of items requiring review appears in the header (for example, 0 pending approvals).
    b. **TICKET.** The unique tracking reference of the submitted request.
    c. **CLIENT.** The name of the submitting client.
    d. **DIVISION.** The division or section that submitted the request.
    e. **STATUS.** The current stage in the approval sequence.
    f. **ACTION.** Buttons to open the request details, approve the request, or reject it. A rejection requires a reason, which the requestor can see.
7. **Refresh and Navigate.** Click Refresh (Figure N.2) in the upper right corner to load the latest submissions. Click View all requests → at the bottom left to go to Request Management.

VIII. Requests / Request Management

The Requests group contains the queues for processing requests and the tools for submitting your own. As a request moves through the workflow, its ticket shows one of the following statuses:

Status	Meaning
For Client Approval	The request is with the Recommending Officer or Immediate Supervisor, when the form requires that review.
For Process Owner	The request is with the Action Officer chain.

Pending Approval	The request is still waiting for an approval step.
Open	The request is active and ready for assignment or processing.
Rejected	The request was rejected with a reason.
In Progress	Personnel were assigned and the work is ongoing.
Pending	A holding status that is set when the workflow allows it.
Resolved	The requestor clicked Mark service complete.
Closed	The requestor clicked Close ticket after submitting feedback.
Reopened	The requestor clicked Reopen request.

Note: Approving a step does not leave the ticket in an “Approved” status. The screen shows the next status in the chain, such as For Client Approval, For Process Owner, or Open, until the assignment sets the status to In Progress.

The Request Management page lets you assign personnel after Action Officer approval and track requests through resolution. It serves as a central queue to monitor active tickets, review submission details, and manage request actions (Figure O).

[Screenshot: Request Management with callouts O.1 and O.2]

Figure O – Request Management and Assignment

1. **Access Request Management.** Navigate to REQUESTS > Request Management in the left navigation menu.
2. **Review the Master Request Table.** Inspect the active and completed tickets (callout 1):
    a. **Header Summary Counter.** The total number of tickets (for example, 1 request).
    b. **TICKET.** The ticket reference code and title (for example, TKT-2026-MUC38NP1IMR / test).
    c. **CLIENT.** The full name of the submitting user.
    d. **OFFICE/DIVISION/UNIT/SECTION.** The originating organizational unit.
    e. **STATUS.** The current stage of the ticket (for example, Closed).
6. **Execute Ticket Actions.** Use the controls under the ACTION column (callout 2):
    a. **View file.** Inspect the generated form and any supporting documents submitted with the request.

b. **Manage →.** Opens the ticket details, where you assign personnel to Open tickets (assignment changes the status to In Progress) and follow the ticket history.

Request File Preview

1. **Selecting View file** from the request list opens a read-only preview window showing the generated request form together with any attached files (Figure P).
2. **The viewer has toolbar controls** to zoom out or in (– / +), check the scale percentage, or Reset the view. Scroll through the preview to verify the submitted information, then close the window with the X button to return to the queue.

Figure P – Request File Preview

IX. Assigned To Me

Assigned to me is your personal work queue. It lists the tickets that were assigned to your account, so you can follow up on them and complete the work (Figure Q). To open it, click REQUESTS, then Assigned to me, in the left sidebar. A badge on the menu shows how many tickets are assigned to you.

Figure Q – Assigned to me queue

This procedure outlines the workflow for processing the service tickets assigned to you.

1. **Access the Personal Queue.** Navigate to REQUESTS > Assigned to me in the left navigation menu.
2. **Review Active Ticket Assignments.** Monitor the tasks in the work table (callout 1):
    a. **Header Summary Counter.** The number of tasks currently assigned to your account (for example, 0 active assignments).
    b. **TICKET.** The tracking reference and title of the assigned ticket.
    c. **CLIENT.** The name of the client who submitted the request.
    d. **CLIENT DIVISION.** The division or section that submitted the request.

e. **STATUS.** The current progress of the ticket (for example, In Progress).

f. **ACTION.** Opens the ticket details.

7. **Process and Close Assigned Tickets.** Carry out the work as requested:
   a. Perform the technical support or administrative task requested.
   b. Keep the ticket updated as the work progresses.
   c. **When the work is complete, notify the requestor.** The requestor then marks the service complete, submits the feedback, and closes the request.

X. My Requests

My Requests lets you track the requests that you submitted for yourself (Figure R). To open it, click REQUESTS, then My Requests, in the left sidebar.

[Screenshot: My Requests page with callouts R.1 and R.2]

Figure R – Personal Requests and Self-Service Submissions

1. **Requests Table.** Shows your requests with the ticket number, service details, approval status, and assigned personnel (Figure R.1). The header shows the number of requests, for example 0 requests.
2. **Open a request.** Click a row to see the uploaded form, the submitted answers, the assigned personnel, and the requestor actions. Once the work is done, click Mark service complete, submit your feedback in the Client Satisfaction Survey, and then click Close ticket or Reopen request.
3. **New request.** Click New request (upper right) to open the form selection panel. When you have no requests yet, you can also click the Submit request button in the table panel.

XI. Submit Request

Submit Request lets you create a request for yourself by choosing a published form. The request appears in your own list (Figure S). To open it, click REQUESTS, then Submit Request, in the left sidebar. Click Back to my requests at the top to return to your list.

[Screenshot: Submit Request page with callout S.1]

Figure S – Submit Request

1. **Access the Submit Request Workspace.** Navigate to REQUESTS > Submit Request in the left navigation menu.
2. **Select a Published Form.** In the Choose a form panel (callout 1), click the Select a form… dropdown to display all published forms, then select the form you need (for example, Technical Assistance Request Form). Its fields and document requirements load.
3. **Fill and Submit the Request.** Complete the fields once the form loads:
    a. Enter the required requestor details, division, and service specifications. Employee information is filled in from PAMANA.
    b. Upload supporting attachments or reference files if the form requires them.
    c. **Press Submit.** The request is routed into its approval workflow and the ticket is logged under your My Requests list.

XII. Settings and Account Profile

This procedure details how to update your profile and password in the Settings panel. Click Settings at the bottom of the sidebar to open it.

1. **Update Account Profile Parameters.** Review and modify your details within the Account section:
    a. **Email.** Displays the registered official email address (for example, resty.morancil@nationalmuseum.gov.ph). (Figure T.1)
    b. **Role.** Displays your assigned role (for example, Admin). (Figure T.2)
    c. **Display name.** Update or verify the name shown in the portal headers and activity logs. (Figure T.3)
    d. **Division / office.** Update or verify your organizational unit (for example, INFORMATION AND COMMUNICATIONS TECHNOLOGY SECTION). (Figure T.4)
    e. **Designation.** Update or verify your official job title (for example, Information Technology Officer I). (Figure T.5)
    f. **Save profile.** Select Save profile to store the updated details. (Figure T.6)
7. **Change Your Password.** Within the Password section:
    a. **Current password.** Enter your current password. (Figure T.7)
    b. **New password.** Enter the new password. (Figure T.8)
    c. **Confirm new password.** Re-type the new password to verify it. (Figure T.9)
    d. **Change password.** Select Change password to save it for future sign-ins.
5. **Set up MFA.** Click Set up MFA in the sidebar to enroll an authenticator app. After enrolling, the login asks for the 6-digit code.

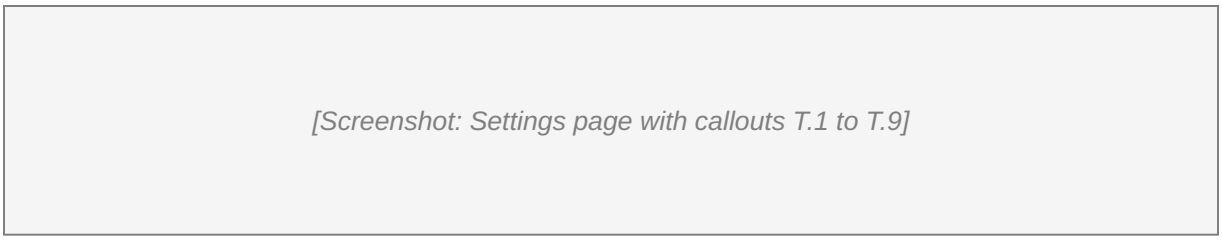

Figure T – Settings and Account Profile

XIII. Daily Activity

The Daily Activity of an Admin user is monitored from the dashboard cards and Today's activity panel, the Approvals and Request Management queues, Assigned to me, Messages, and the notification bell in the top bar. Click the notification bell to see the items that need your attention, such as pending approvals, new messages, and pokes.

Appendix A: Approvals

The undersigned acknowledge that they have reviewed the User Manual and agree with the information presented within this document. Changes to this User Manual will be coordinated with, and approved by, the undersigned, or their designated representatives.
